

Knowledge for a Clean Energy Future

Newsletter n° 10 July 2020

Enel Foundation is a non-profit organization.

Enel Foundation focuses on clean energy's crucial role in ensuring a sustainable future for all. We conduct research and education exploring the implications of global challenges in the energy domain. We operate in partnership, at the intersection of business and society leaving no one behind in the energy transition.

Discussing E-Quality in the context of energy transition with EU Commissioner for Energy Kadri Simson

The impacts of climate policies vary according to the geographical area and social group they target. Mitigating measures need therefore to be set in place in order to protect low-income population and vulnerable communities from uneven distributional effects. To address this issue and outline several remedial solutions, Eurelectric just conducted a study, "E-Quality: Shaping an inclusive energy transition", with the scientific contribution of Enel Foundation and in collaboration with Guidehouse and Cambridge Econometrics.
