

## Enel Foundation is a non-profit organization.

Enel Foundation focuses on clean energy's crucial role in ensuring a sustainable future for all. We conduct research and education exploring the implications of global challenges in the energy domain. We operate in partnership, at the intersection of business and society leaving no one behind in the energy transition.

## TOP STORY

**Training for Italian diplomats on the implications of energy transition**

For the third consecutive year [Enel Foundation](#) and [ISPI](#) (Institute for International Political Studies) cooperated with the Italian Ministry of Foreign Affairs and International Cooperation (MAECI), providing training on the international implications of energy transition and climate change to over 60 Italian career diplomats.
